Our Stage

ACE
CREATION

Delivering to the World

We export trucks, pickups, SUVs, forklifts, and more, mainly to the South Pacific region.

By supplying products to our clients, including those involved in ODA projects, we contribute to the sustainable development of South Pacific countries.

We also develop original furniture and import high-quality functional and design-oriented furniture and building materials from Germany, the Netherlands, and the United States.

We support creating modern and comfortable office and living spaces.

We provide trusted services in both export and import, valuing long-term partnerships with our customers.

Message

Established in 1977, we began with exporting used vehicles to South Pacific countries and are approaching our 50th anniversary.

Though these countries may be unfamiliar to Japan, from the start, our business has focused on exports to this region.

Currently, our core businesses include exporting new commercial and construction vehicles,

domestic furniture sales (imported and in-house brands), meat sales, and office leasing.

With fewer than 20 employees under the president, our annual sales are approximately 10 billion yen.

However, we do not operate with aggressive competition.

Prioritize work-life balance and provide supportive environments for effective work.

Work is important, but "enjoying life" is more so.

We move toward common goals with earnestness and fun alongside colleagues who share the same time.

And to achieve this, we cultivate attractive personalities that others like without arrogance.

This philosophy has guided us so far.

We consider connections between people crucial both in work and life.

And when the "individuality" woven from each individual's humanity and life experiences comes together and each individual's

"likes = strengths" are fused together, our company's true power emerges.

The unique multicultural market drives our motivation, bringing new discoveries and insights.

Exchanges with local communities generate grand businesses and significant social contributions.

Beyond profit, we deeply feel our social contributions to regions and countries and find great purpose in this.

This is the ideal we pursue.

"Developing unique businesses with colleagues we love, doing work we love."

Based on this philosophy, we fully leverage individual abilities, respect each other,

grow together, and continue challenging new possibilities.

Kudan-minami, Chiyoda-ku, Tokyo

Vehicle

We offer vehicles tailored to meet the diverse needs of each export destination.

For examples, for Papua New Guinea, we mainly supply trucks ideal for conversion into buses, and other various types of trucks ranging from small to large sizes.

For Fiji, besides trucks, buses we supply (with locally built bodies) serve as essential transportation for residents.

In New Caledonia, pickup trucks are used as private vehicles and corporate cars by local companies.

Through close consultations with vehicle manufacturers and local dealers, we deliver vehicles suited to each market's specific requirements.

Meat

We supply poultry, mainly chicken meat, and processed meat products, as well as frozen mochi (glutinous rice cake) to food service providers and mass retailers.

Listening carefully to customer requests, we collaborate with ingredient suppliers and partner factories to provide safe and reliable products suitable for various lifestyle situations.

Furniture

We carry our original domestic furniture brand FLACE, alongside renowned international brands such as:

THONET: The world's oldest existing furniture brand founded in 1819 in Germany

COR: One of Germany's top luxury sofa brands

interlübke: The world's first system storage furniture brand
3form: U.S.-based resin brand combining sustainability and design

We deliver high-quality products from Japan and worldwide.

Office

Part of our head office building is leased as office space.
